## Technical Data

A range of acrylic metallic paints based on an acrylic resin giving good exterior durability and water resistance and excellent adhesion qualities - they are suitable for use on wood, metal and interior walls. Dependent on application different scenic effects can be created from a light coating for a translucent look to a more opaque look.

## Application

Stir well before use to ensure no separation of pigment and even application.

These products are formulated to be applied using normal decorating methods via brush or roller.

## Drying Time

Drying time is dependent on substrate and application method, but should be as follows:
- Touch Dry: 1 Hour
- Re-Coat Time: 2-3 Hours

## Coverage

Dependent on application method but approximately 6-8 m² per litre.

## Thinners

Water

## Physical Constants

VOC Level: 40 gms /litre

## Packaging

Acrylic metallic paint is available in these sized containers:
- 1Litre & 5Litre

## Health and Safety

Refer to MSDS before use.
